## **Rand McNally chooses Aeris network for its TND™ 760 Fleet Edition mobile communication and navigation solution**

SAN JOSE, CA – October 18, 2011 – Rand McNally, which is launching its TND™ 760 Fleet Edition mobile communication and navigation product this month, has selected the Aeris network to power the device's wireless communications. Providing specialized and ruggedized M2M CDMA voice, data and SMS coverage to more than 309 million people in the U.S. plus service across Canada and Mexico along with long-term 2G and 3G network support, Aeris became the preferred choice for Rand McNally.

Rand McNally has streamlined the communications to FleetWatcher, the back-end tracking and monitoring tool that provided with the TND™ 760, via a single interface to Aeris. In addition to providing connectivity, the interface provides the industry's best back office tools for provisioning, activations, billing, reporting, and trouble shooting.

Aeris operates North America's largest wireless network service, developed exclusively to deliver Machine-to-Machine (M2M) communications to millions of devices, billions of times a year. Aeris offers complete CDMA coverage of North America, and the ability to optimize the quality of service that Aeris customers receive through that network.

"Companies look for a partner who can provide a competitive advantage," said Paul Drysch, Vice President of Telematics for Aeris Communications. "We have been able to provide Rand McNally an industry-leading network solution that makes Rand McNally's operations more efficient while also improving their device's performance in the field."

### **About Aeris Communications, Inc.**

Aeris® Communications, Inc. is the leading wireless communications service provider dedicated exclusively to the Machine-to-Machine (M2M) and telematics marketplace across North America. For information on how Aeris can help you rapidly scale your M2M solution while also lowering your total cost of ownership, visit [www.aeris.com](http://www.aeris.com) or call 1-888-GO-AERIS.
