Rand McNally Integrates Document Management and Workflow into Mobile Fleet Management Devices

Using TRANSFLO[®], documents are delivered and managed same-day, improving cash flow

SAN DIEGO, October 6, 2014 – Today, at ATA's Management Conference and Exhibition, [Rand McNally](#) announced the integration of [Pegasus TransTech's TRANSFLO[®]](#) document management and integrated delivery solution with [Rand McNally's mobile fleet management devices](#). The new solution enables fleets and drivers to communicate and manage workflow driven by documents quickly and easily, resulting in improved cash flow and document management.

Initially available as part of the [TPC 7600](#) with an in-cab scanning option, TRANSFLO will soon be an option on the full line of Rand McNally mobile fleet management devices – including the [TND[™] 760](#) and [HD 100](#).

“The addition of TRANSFLO capabilities helps our fleet customers better manage document flow, increase accuracy, and process billing more quickly,” said Jim Rodi, Senior Vice President, Mobile Communications Group, Rand McNally. “Invoicing customers quickly and accurately results in improved cash flow and ROI.”

A scan from Rand McNally's system flows seamlessly into the TRANSFLO software. The software allows for efficient processing, storage and quick retrieval of critical business documents such as proof of delivery, bills of lading, packing lists, receipts, employment applications, accident reports and much more. Receipts for scanned information can be set to

trigger additional actions on the part of dispatch, billing, and operations. Additionally, any document can be accessed by multiple areas of the company for reference or action.

“This is an important integration for us with a mobile fleet management solution, and who better to integrate with than an industry veteran like Rand McNally,” said Frank Adelman, President of Pegasus TransTech. “The integration allows our joint customers to capitalize on the technology investment they’ve already made with Rand McNally.”

For more information on Rand McNally’s mobile fleet management services, call 1-800-789-6277 or visit www.randmcnally.com.
