

Rand McNally Releases New OverDryve™ Pro II with 7-Inch Screen

The new model for professional drivers includes all the same upgrades and features as the recently launched 8-inch device

CHICAGO, Jan. 5, 2021 – Following the launch last October of OverDryve™ 8 Pro II – the next generation of its powerful, top-end trucking device – Rand McNally today announced the availability of the OverDryve™ 7 Pro II. Just like its larger-screened predecessor, the OverDryve™ 7 Pro II is designed for best-in-class navigating, playing SiriusXM® radio, recording dash cam footage, calling and texting hands-free, browsing the web, and more.

The new device, with a vibrant, high-definition 7-inch screen, is powered by Rand Navigation 2.0 – the industry’s leading navigation built specifically for professional drivers. The 2.0 platform, which debuted last year, includes more truck-specific routes than other providers as well as innovative data overlays to help drivers with the business of trucking.

Beyond navigation, the OverDryve™ 7 Pro II has been redesigned with upgraded processing power to be three times faster than the first-generation device. After months of testing and refinements, the new OverDryve™ 7 Pro II is fast, fully featured, and rock solid.

Key features of the OverDryve™ 7 Pro include:

- A vibrant, **high-definition 7-inch screen**;
- **Rand Navigation 2.0** featuring advanced truck routing, a modern, clean interface, and striking, easy to see visuals such as three-dimensional cities and landmarks. The new mapping includes **improved routing** that is optimized with sophisticated connected features, such as real-time, traffic-influenced routing;
- A fully **adjustable dash cam** with loop recording and an integrated G sensor to create optimal recordings;
- Built-in **SiriusXM®** radio with the first 3 months of service free;
- An upgraded, **stronger magnetic mount** that supports tethering to enable playing audio from OverDryve™ 7 Pro through any **Bluetooth®** speaker;
- Dedicated digital signal processing for **greater audio clarity** on calls;
- Significantly **more battery capacity** and more powerful processors for faster routing and smoother graphics;
- Live **traffic**, current **fuel prices**, and **weather** conditions down the road.* The information is presented with dynamic overlays – vs. a text listing – that can be adjusted according to driver preference to render the right balance of opacity to reveal the mapping underneath

- Enhanced **driver tools** such as mileage and fuel logs;
- **ELD-readiness** with the Rand McNally DriverConnect app on board;
- And, safety features such as **voice assistance** and **hands-free** calling and texting.**

The OverDryve™ 7 Pro II is the latest product in the company's line of dedicated in-cab devices to be moved to the Rand Navigation 2.0 platform. The Chicago-based company also is offering the navigation software as an Android app for trucking fleet subscription.

The OverDryve™ 7 Pro II is available at travel center locations, online retailers, and at store.randmcnally.com.
